CTMG-48JD – Sub-Compact/ Compact Tractor Mini Grapple for John Deere Tractors

Designed for John Deere Sub-Compact and compact tractors (up to 35-hp) equipped with a loader to handle debris and so much more – the CTMG-48JD from Worksaver is changing the way properties owners are cleaning up. This 48-inch wide grapple with John Deere Series hook up offers the operator the ability to own a job matched tool to collect debris, firewood, brush or orchard prunings, resulting in time savings and low cost of ownership.

The single upper grapple of 3/8" steel is 31" wide with gripping notches cut into the tines to help retain brush and other loose material.

Grapple is open and closed with a 2"x8" hydraulic cylinder. Depending on the tractor the dealer may have to install an additional hydraulic circuit or diverter valve to operator this cylinder. Hydraulic hoses and fittings are not included with the unit.

The lower 48" wide rake has tines made from 1/2" steel also featuring gripping notches to help retain loose materials. Heavy-wall tubing runs through the lower tines and gussets are placed at each contact point for added strength.

John Deere Mount

Designed to interface with loaders on John Deere Sub-Compact & Compact tractors up to 35-hp that utilize the John Deere hook & pin quick attach. Making it easy to change from bucket to grapple when clean-up needs arise.

Parking Stand

Standard on the CTMG-48JD is a stored on the unit parking stand which makes hook-up of the grapple easier. Parking stand also helps to provide solid footing when unit is storage on a hard flat surface.

CTMG-48JD – Features

- John Deere Quick Attach interface to mount to H120, H130, D160, D165, 200C and 200CX loaders
- Greaseable pivot points for long service life
- Standard Parking stand to assist storage and hook-up
- Simple efficient design with few moving parts for greater reliability
- Gripping notches CNC cut into tines helps to secure loose material
- Durable heavy-wall tubing provides strength to the lower tines
- 33-inch grapple opening provides for maximum capacity and ease of gathering materials
- Shipped less hoses, allowing the dealer to correctly match the hose length to the tractor / loader
