Weld-on Plate for John Deere 300 /400 Series

Worksaver, Inc. announces the addition of a John Deere 300 / 400 series Weld-on Plate to complement our lineup of weld-on plates and kits. Formed from 5/16" steel for durability this plate offers the customer versatility when converting attachments. Designed to be welded to existing attachments, this allows them to be used with John Deere 300 / 400 series loaders that use the JD attaching system. The JD 300/400 Plate features steel cast upper hooks, welded locking pins spaced to OEM specifications to assure proper fit when welded to buckets or other attachments.

Production starts: July 2015

Note: JD 300/400 Plate will ship UPS
