Pull-back Kits for 36-Series Snow Pushers

Pull-back kits are designed to increase the versatility of the 36-Series Snow Pushers. When installed the pull-back allows the operator to tilt the snow pusher forward engaging the Ultra- rubber edge with the ground to pull the snow away from overhead doors, buildings and loading docks quicker. This reduces hand shoveling, which allows the operator to get more done.

The kit bolts on using existing mounting points on the end plates.

Ultra-rubber edge of SBR (Styrene Butadiene Rubber) rubber with a durometer of 65 and a 2500# tensile strength provides maximum performance and durability. This rubber edge is designed for use on multiple surface types.

Time Savings

Clearing snow away from hard to reach places like overhead doors, docks and buildings saves time.

Reduces the time needed for hand shoveling, keeps you moving snow.

Adjustable

The 1.5" x 8" Ultra- rubber cutting edge is slotted allowing it to be adjusted and reversed, which provides 4-edges to increase its service life.

Pull-back Kits for 24-Series Snow Pushers

Fits	Item #	Description	Weight
8-ft. Models	358120	Pull-back Kit for 8-ft. Pusher	190
10-ft. Models	358125	Pull-back Kit for 10-ft. Pusher	230

Pull-back kits are shipped via truck.

Available for Shipments – November 2015

Pull-back Features

- Ultra- rubber edge is 1.5” x 8” and is reversible for long service life
- Ultra- rubber edge is slotted providing 3-inches of adjustment
- Ultra- rubber edge of SBR (Styrene Butadiene Rubber) rubber with a durometer of 65 and a 2500# tensile strength provides excellent durability
- Convenient bolt-on installation to existing holes on end plates for ease of use
- Time savings by reducing the time needed to hand shovel
- Ideal for pulling snow away from overhead doors, loading docks & walls
- Increases the versatility of the Snow Pusher
