36-Series Snow Pushers for Skid Steers and Tractor Loaders

Designed for Skid Steers and Tractors equipped with a loader, the 36-Series Snow Pushers are job matched for maximum performance. Models are available with the “universal” skid steer attach method, which is used on skid steers and many utility tractor loaders today.

36-Series Snow Pushers are also offered for the 400/500 series John Deere loaders, as well as loaders using the Euro / Global tool carrier..

Available in widths of 8’ or 10’ these snow pushers are offered with a 1.5” x 8” reversible premium rubber cutting edge.

CNC formed 7-gauge moldboard with two (2) 4-inch industrial C channels across the width of the backside for strength and durability make these Snow Pushers high performers. 36” x 36” end plates of 5/16” material help retain snow as it is pushed forward without leaving a windrow. Pushers are robotically welded for consistent quality and strength. Four-inch wide adjustable / reversible skid shoes of abrasion resistant steel are standard equipment on both size units. The rubber edge allows them to be used on asphalt as well as multiple surface types like decorative driveways, cobblestone or pavers.

Skid Steer Type Mount

Ideal for skid steer loaders and utility tractors with loaders that utilize the “universal” skid steer attaching system.

36-Series Pushers are also available with the JD 400/500 series attaching interface and models that fit loaders with the Euro / Global style tool carrier.

Rubber Cutting Edge

These Snow Pushers are equipped with premium 1.5” x 8” adjustable and reversible cutting edge for use in clearing multiple surface types.

Skid Shoes

Four-inch wide adjustable / reversible Skid Shoes are made with Abrasion Resistant steel providing reliable performance and long service life.

End-Plates

End-Plates are 36-inches in height & depth made from 5/16" material. A convenient tie down location is provided to assist securing the unit during transport.

Model	Item #	Description	Weight	List
36-Series for use with Skid Steer loaders and Utility Tractors with loaders that use the "universal" skid steering attaching system				
SPS-3696R	358060	8-ft Pusher with Rubber edge	815	\$2,795.00
SPS-36120R	358090	10-ft Pusher with Rubber edge	905	2,995.00
36-Series for use with John Deere 400/500 loaders with JD attaching system				
SPJD-3696R	358070	8-ft Pusher with Rubber edge	780	\$2,825.00
SPJD-36120R	358100	10-ft Pusher with Rubber edge	870	3,025.00
36-Series for loaders with Euro / Global tool carrier attaching system				
SPG-3696R	358080	8-ft Pusher with Rubber edge	810	\$2,795.00
SPG-36120M	358110	10-ft Pusher with Rubber edge	900	2,995.00

Shipments start in mid-October 2015

Snow Pushers for Skid Steers and Tractors Loaders

- CNC formed 7-gauge moldboard for added strength
- Two (2) 4-inch industrial C channel provides solid support
- Pusher side plates are 36" high (without skid shoe) and 36" deep
- Side support brace tubes are standard on all models
- Premium Rubber cutting edge is standard
- Premium rubber edge is 1.5" x 8" and is reversible for long service life
- Premium rubber edge is slotted providing 3-inches of adjustment
- Premium Rubber edge of SBR (Styrene Butadiene Rubber) rubber with a durometer of 65 and a 2000# tensile strength provides high performance and durability
- Adjustable Skid Shoes made from Abrasion Resistant Steel are 4-inches in width and reversible
- Units are painted Industrial Yellow with 2-component urethane paint
- "Universal" skid steer mount for easy attaching to skid steer loaders and utility tractors that use the "universal" skid method as well.
- John Deere 400/500 loader attaching system pushers are available
- Models are available that incorporate the Euro / Global mount for tractor loaders equipped with that style tool carrier.
